The Introduction

L'Introduction

HE general Esteem that Travellers have or Things that are foreign, is in nothing more conspicuous than with Regard to Building. We travel, for the most part, at an Age more apt to be imposed upon by the Ignorance or Partiality of others, than to judge truly of the Merit of Things by the Strength of Reason. It is owing to this Mistake in Education, that so many of the British Quality have so mean an Opinion of what is performed in our own Country; though, perhaps, in most we equal, and in some Things we furpals our Neighbours.

I have therefore judged it would not be improper to publish this Collection, which will admit of a fair Comparison with the best of the Moderns: As to the Antiques, they are out of the Question; and, indeed, the Italians themselves have now no better Claim to them than they have to the Purity of the Latin.

WE must in Justice acknowledge very great Obligations to those Restorers of Architecture, which the Fifteenth and Sixteenth Centuries produced in Italy; Bramante, Barbaro, Sansovino, Sangallo, Michael Angelo, Rapbael Urbin, Julio Romano, Serglio, Labaco, Scamozzi, and many others, who have greatly help'd to raise this Noble Art from the Ruins of Barbarity: But above all, the great Palladio, who has exceeded all that were gone before him, and surpass'd his Cotemporaries; whose ingenious Labours will eclipse many, and rival most of the Ancients. And indeed, this excellent Architect feems to have arrived to a Ne-plus-ultra of his Art: With him the great Manner and exquisite Taste of Building is lost; for the Italians can no more now relish the Antique Simplicity, but are entirely employed in capricious Ornaments, which must at last end in the Gotbick.

For Proof of this Affertion, I appeal to the Productions of the last Century. How affected and licentious are the Works of Bernini and Fontana? How wildly extravagant are the Defigns of Boromini, who has endeavoured to debauch Mankind with his odd and chimerical Beauties, where the Parts are without Proportion, Solids without their true Bearings, Heaps of Materials without Strength, excessive Ornament without Grace, and the Whole without Symmetry? And what can be a stronger Applance?

Estime génerale que les Voyageurs ont pour les choses étrangères ne se voit en rien plus que par rapport à la manière de Bâtir. Nous voyageons, pour la plus part, à un Age plus facile à en étre imposés par l'Ignorance & la Partialité des autres, que capables de juger veritablement du Merite des Choses par la Force de la Raison. C'est cette Méprise dans l'Education, qui fait que tant de Personnes de Qualité de la Grand Bretagne ont une si pauvre Opinion, de ce qui se fait dans leur Païs; quoique, peut-être, nous egallions dans la plus part & en quelque chose surpassions nos Voisins.

C'est pour quoi j'ai jugé à propos de publiër ce Recueil, qu'on pourra fort bien comparer aux mellieurs des Modernes. Quant aux Anciens, on les laisse là, & à la Verité, les Italiens mêmes n'y ont non plus de Droit qu'ils en ont à la Pureté du

Il faut, en Justice, que nous reconnoissions que nous sommes fort obligés à ces Restorateurs de l'Architecture, que le Quinziême & Seizième Siècle ont produit en Italie; Bramante, Barbaro, Sansovino, Sangallo, Michael Angelo, Raphael Urbin, Julio Romano, Serglio, Labaco, Scamozzi, & plusieurs autres, qui ont beaucoup aidé à tirer ce Noble Art des Ruines de l'Ignorance : Mais sur tout, le grand Palladio, qui a excellé tous ceux qui avoient paru avant lui & surpassé ses Contemporains; dont les Ouvrages ingenieux en éclipseront plusieurs, & égaleront la plus Part des Anciens. Et reritablement, cet excellent Architecte semble être arrivé au Ne-plus-ultra de son Art. Nous avons perdu avec lui la belle Maniere & le Goût exquis de Bâtir; car les Italiens ne peuvent plus à present goûter la Simplicité Antique, mais sont entierement employés aux Ornements capricieux qui degenereront enfin dans le Gothique.

Pour prouver cette Assertion, j'en appelle aux Productions du dernier Siecle: Combien les Ouvrages de Bernini & Fontana sont ils affectés & licentieux? Quelle grande Extravagance ne voit-on pas dans les Desfeins de Boromini, qui a tâché à débaucher le Genre humain par ses Beautez irregulieres & chimeriques, où les Parties sont sans Proportions, les Solides sans leur veritable Support, des Monceaux de Materiaux sans Force, des Ornements excessifs fans Grace, & le tout sans Symmetrie? Et où peut ment, that this excellent Art is near lost in on trouver un plus fort Argument, que cet excellent that Country, where such Absurdities meet with Art est presque perdu dans un Païs où l'on applaudit à de telles Absurdités?

THE INTRODUCTION.

It is then with the Renowned Palladio we enter the Lists, to whom we oppose the Famous Inigo Jones. Let the Banqueting-House, those excellent Pieces at Greenwich, with many other Things of this great Master, be carefully examined; and I doubt not, but an impartial Judge will find in them all the Regularity of the former, with an Addition of Beauty and Majesty, in which our Architest is esteemed to have out-done all that went before; and when the Plans he has given of Whiteball, which you will find in the Second Volume, are carefully examined into, I believe all Mankind will agree with me, that there is no Palace in the World to rival it.

AND here I cannot but reflect on the Happiness of the British Nation, that at present abounds with so many learned and ingenious Gentlemen, as Sir Christopher Wren, Sir William Bruce, Sir John Vanbrugh, Mr. Archer, Mr. Wren, Mr. Wynne, Mr. Talman, Mr. Hawksmore, Mr. James, &c. who have all greatly contributed to adorn our Island with their curious Labours, and are daily embellishing it more.

I hope, therefore, the Reader will be agreeably entertained in viewing what I have collected with fo much Labour. All the Drawings are either taken from the Buildings themselves, or the original Designs of the Architects, who have very much affisted me in advancing this Work. And I can, with great Sincerity, affure the Publick, that I have used the utmost Care to render it acceptable; and that nothing might be wanting, I have given the following Explanation of each Figure.

C'est donc avec le renommé Palladio que nous entrons en Lice, auquel nous opposons le sameux Inigo Jones: Qu'on examine soigneusement la Maisson des Banquets, ces excellentes Pièces a Greenwich, & plusieurs autres choses de ce grand Maitre, & je ne doute pas que tout Juge impartial n'y trouve toute la Regularité du premier, avec une Addition de Beauté & de Majesté, qui prouve que notre Architecte a surpassé tous ceux qui l'ont precedé; & quand les Plans qu'il a fait de Whiteball, & qu'on trouvera dans le Second Volume seront soigneusement examinés je crois que tout le Monde conviendra avec moi, qu'il n'y a point de Palais en Europe qui en approche.

Je ne puis m'empêcher de restéchir ici sur le Bonheur de la Nation Britanique, qui abonde à present en tant d'ingenieux & savans Gentisshommes, tels que Messieurs les Chevaliers Christophre Wren, Guillaume Bruce, Jean Vanbrugh, Messieurs Archer, Wren, Wynne, Talman, Hawksmore, James, &c. qui ont tous beaucoup contribué à orner notre Isle de leur curieux Ouvrages, & l'embellissent tous les Jours de plus en plus.

C'est ce qui me fait esperer que le Lecteur prendra beaucoup de plaisir à examiner ce que j'ai ramassé avec tant de Peine. Tous les Plans sont ou pris des Bâtiments mêmes, ou des Desseins originaux des Architectes, qui m'ont fort assisté à avancer cet Ouvrage: Et je puis, avec grande Sincerité, assure le Public, que j'ai employé tout le soin possible pour le rendre utile & agreable; & asin qu'il n'y manquât riën, j'ai donné l'Explication suivante de chaque Figure.

AN

EXPLICATION

EXPLANATION

Of all the

PLATES in the First Volume.

St. Paul's Church, London, p. 3, 4.

HIS Noble Fabrick was begun by Sir Christopher Wren, Anno 1672, and happily finished by him 1710. I have made two Plates, the Plan and West Front; and did intend the Section, but was prevented by the Architect, who proposed to publish it himself. I have omitted the Rusticks and fluting the Columns in both Orders, to avoid the Confusion of so many Lines in so small a Scale. Here is a Rustick Basement that carries two entire Orders: The first is Corinthian, four Foot in Diameter, with a plain Entablature; there is an Arcade all round the Building, that serves for Lights. The second Order is Composite, proportionably diminished with regard to the inferior; here a very rich Tabernacle reigns throughout the whole Inter-Columnations, very like that excellent Model in the Rosundo at Rome, but with this Difference, that in this the Pedestal is pierced, to give Light. A more particular Account is to be taken from the Delign by the Scale and Compass, which would be too tedious in this Introduction. The whole Fabrick is performed in Stone by those excellent and judicious Artists, Messrs. Edward Strong, Senior and Junior, whose consummate Knowledge in their profession has greatly contributed to adorn the Kingdom; and it is beyond Exception, that this is the second Church in the World.

St. PETER's at Rome, p. 5, 6. 7.

Thought it would not be improper to present the Curious with the Plan, Elevation, and Section of this Majestick Building; and the more that I dare safely aver, that it's the most correct, with respect to the Truth of Architecture, or Cleanness of Engraving, that was ever published; and the Reader may have the Satisfaction to view both reduced to British Measure. The Critics generally condemn the excessive Height of the Attick, which they confine to a third of the inferior Column: That the Pediment, supported by a Tetrastyle, is mean for so great a Front, which at least would demand a Hexastyle: That the Breaks are trisling, and the Parts without any Proportion: That the great Body of the Church, projected by Carlo Maderno, has extreamly injured the august Appearance of the Cupola, which is very much lost by being removed so far from the East Front, contrary to Michael Angelo's Design, who conformed the whole Plan to a Square, wherein he described a Grecian Cross. But all agree, that the Width is noble, and the Cupola admirable. It was begun Anno 1513, and sinished 1640.

A New Design for a Church in Lincoln's-Inn-Fields. p. 8, 9.

THIS Design I made at the Desire of some Persons of Quality and Distinction, when it was proposed to have a Church in this Noble Square. The Plan is reduced to a Square and Circle in the Middle, which, in my weak Opinion, are the most persect Figures. In the Front I have removed the Angular Towers at such a Distance, that the great Cupola is without any Embarrass. Here is a regular Hexastyle that commands the Front, which, with the other Parts, are all in certain

PLANCHES du Premier Volume.

De toutes les

L'EGLISE DE St. PAUL à Londres, p. 3, 4.

ETTE Noble Fabrique fut commencée par Mr. le Chevalier Christophle H'ren l'An 1672, & heureusement finië par lui en 1710. J'en ai fait deux Planches, le Plan & le Front au West; & destinois la Section, mais en ay été empêché par l'Architecte, qui s'est proposé de la publier lui même. J'ai omis les Rustiques & de caneler les Colomnes dans les deux Ordres pour eviter la Confusion de tant de Lignes dans une si petite Echelle. Il y a ici une Base Rustique qui porte deux Ordres entiers : Le premier est Corinthien, quatre Pies de Diametre avec un Entablement uni; il y a une Arcade tout au tour du Bâtiment qui donne du jour. Le second Ordre est Composé, diminué à proportion par rapport à l'inferieur; ici regne un très riche Tabernacle par toutes les Intercolomnes fort approchant de cet excellent Modele dans le Rotondo à Rome, mais avec cette Difference, que dans celui-ci, le Piédestal est percé, pour donner du Jour. L'on peut prendre une Relation particuliere du Dessein par l'Echelle & le Compas, qui feroit trop ennuieuse dans cette Introduction. Le tout est executé en Pierres de Taille par ces excellents & judicieux Artistes, Mr. Edouard Strong, Pere & Fils dont la Connoissance consommée dans leur Profession a beaucoup contribué à orner ce Royaume, & on ne peut pas nier que ce ne soit la seconde Fglise du Monde.

St. Pienne à Rome, p. 5, 6, 7.

J'Ai jugé à propos de faire present aux Curieux du Plan, Elevation, & Section de ce Majesteux Edifice; & cela d'autant plus que j'ose certifier, que c'est le plus correct, par rapport à la Verité de l'Architecture ou netteté de la Gravûre qui ait jamais été publié; & le Lecteur aura la Satisfaction de les trouver reduits à la Mesure Britanique. Les Critiques condamnent généralement l'excessive hauteur de l'Attique, qu'ils bornent à un troissième de la Colomne insérieure; que le Fronton supporté par un Tetrastyle, est pauvre pour un si grand Front, qui demanderoit au moins un Hexastyle: Que les Projections sont des bagateles, & les Partiès sans aucune Proportion: Que le grand Corps de l'Eglise projetté par Carlo Maderno, a fait fort grand tort à l'auguste Apparence du Dome, qui se perd beaucoup etant transporté à une si grande Distance du Front vers l'Est contraire au Dessein de Michael Angelo qui conforma tout le Plan à un Carré où il representoit une Croix Greque. Mais tous tombent d'accord, que la Largeur est noble, & le Dome admirable. Il su commence l'An 1513, & sini en 1640.

Nouveau Dessein pour une Eglise dans Lincolns-Inn-Fields, p. 8, 9.

JE sis ce Dessein, à la Requête de quelques Personnes de Qualité & de Distinction, quand on proposa dériger une Église dans ce Noble Carré. Le Plan est reduit à un Carré & Cercle au milieu, qui, selon ma soible Opinion, sont les plus parsaites Figures. Dans le Front j'ai eloigné les Tours Angulaires à une telle Distance que le grand Dome est sans aucun Embarras. Voici un regulier Hexastyle qui commande le Front, lequel, avec les autres Parties, sont toutes en des Mesures.

Measures of Proportion. I have introduced but one single Corinthian Order, supported by a full Basement, and sinished with an Attick and Ballustrade. The Cupola is adorned with a single Colonade of detached Columns; the Whole is dress'd very plain, as most proper for the sulphurous Air of this city, and, indeed, most conformable to the Simplicity of the ancients. Done Anno 1712.

St. PHILIP's CHURCH at Birmingbam, p. 10, 11.

THIS Church is defign'd by the ingenious Mr. Archer; and is justly esteemed a very beautiful Structure. Anno 1710.

The Banquering-House at Whiteball, p. 12, 13.

THIS incomparable Piece was defign'd by the immortal Jones, as one Pavillion for that admirable Model he gave for a Royal Palace; and if this Specimen has justly commanded the Admiration of Mankind, what must the finished Pile have produced? I hope Britain will still have the Glory to accomplish it, which will as far exceed all the Palaces of the Universe, as the Valour of our Troops and Conduct of our Generals have surpassed all others. Here our excellent Architect has introduced Strength with Politeness, Ornament with Simplicity, Beauty with Majesty: It is, without Dispute, the first Structure in the World, and was built Anno 1616.

The QUEEN'S House at Greenwich, p. 14, 15.

Retirement for the Queen-Mother. I have made two Plates: The Plan is near a Square, being 116 Foot by 120; the Proportion of the Rooms are extream just; and the great Hall is admirable, making an exact Cube of 40 Foot. In the Front is a noble Rustick Basement, which supports a beautiful and regular Loggio of the Iconick Order, finished with a just Entablature and Ballustrade round the whole Building, which was executed

The GREAT GALLERY in Somerset-Gardens, p. 16.

THIS noble Arcade was taken from a Design of Inigo Jones, but conducted by another Hand. Some object, that the great Cornice is too camuse, and that the Dress of the Windows have not Relief enough, which is only chargeable upon the Execution; but all agree that the Proportions are just, and the Design excellent. I have neglected the Plan, being of little Use on this Occasion. It was built Anno 1662.

Gunnersbury-House, near Brentford, p. 17, 18.

THIS House was executed by Mr. Webb, Disciple to Jones, from a Design of his great Master. I have made two Plates: The first is the Plan of the first and second Floors: The Apartments are noble, regular, and commodious; the Rooms well-proportioned. The second is the Front, which contains a large plain Basement, supporting a handsome Corinthian Loggio. Some find the Inter-Columnation in this Hexastyle too open; and that to leave out the Freeze and Architrave of each Side the Pediment, is a Licence not to be introduced without great Necessity. It was built Annota663.

A NEW DESIGN for the Duke of Argyle, p. 19, 20.

Have inscrib'd this Design to this illustrious Name, whose great Actions have filled the World with Surprize and Admiration; Ramellies and Tannieres are immortal. And as it's my greatest Honour to receive my Blood from his August House, I thought I could no where so properly consecrate the first Essay of my Invention, as an eternal Monument of the deepest Respect and Gratitude. I have given two Plates: In the first are two Plans in a Square of 112 Foot; the Apartments of State are below, raised from the Court by six Steps, which lead into the great Hall, making a Cube of 50 Foot, and has a Loggio within, dividing the two Stories. From the Hall you enter the Salon, attended with two noble Apartments of State fronting the Gardens. All the Rooms are either upon the

certaines de Proportion. Je n'ai introduit qu'un simple Ordre Corinthiën supporté par une pleine Base, & fini avec un Attique & Ballustrade. Le Dome est orné d'une simple Colonade de Colomnes détachées; le tout est fort uni comme plus propre pour l'Air sulphureux de cette Ville, &, en verité, fort conforme à la Simplicité des Anciëns. Fait l'An 1712.

L'Eglise de St. Philipe à Birmingbam, p. 10, 11.

ETTE Eglise est projettée par l'ingenieux Mr. Archer; & est justement estimée une très belle Structure. l'An 1710.

La Maison des Banquets à Whitehall, p. 12, 13.

CETTE incomparable Pièce fut tirée par l'immortel Jones comme un Pavillon pour cet admirable Modele qu'il donna pour un Palais Royal; & si cet Echantillon s'est fait justement admirer du Genre Humain, qu'auroit produit le Batiment étant sini? J'espere que la Grande Bretagne aura la Gloire de l'accomplir, & qu'il surpasser autant tous les Palais de l'Univers que la Valeur de nos Troupes & la Conduite de nos Generaux ont surpasse tous les autres. Ici notre excellent Architecte a introduit la Force avec la Politesse, l'Ornement avec la Simplicité, la Beauté avec la Majesse. C'est, sans contredit, la première Structure du Monde. Elle sut bâtie l'An 1616.

La Maison de la Reine à Greenwich, p. 14, 15.

LLE est du même Architecte, & étoit une Sofitude pour la Reine-Mère. J'en a fait deux Estampes: Le Plan approche d'un Carré, étant de 116 Piés par 220: Les Proportions des Chambres sont extremement justes; & la grande Salle est admirable, faisant un exact Cube de quarante Piés. Il y a dans le Front une noble Base Rustique, qui supporte un beau & regulier Loggio de l'Ordre Ionique sini par un juste Entablement & Balustrade autour de tout l'Edisice, qui sut execute l'An 1620.

La GRANDE GALERIE dans les Jardins de Somerfet, p. 16.

ETTE noble Arcade fut prise d'un Dessein d'Arigo Jones, mais conduite par une autre Main. Quelques-uns objectent que la grande Corniche est trop câmuse, & que l'Arrangement des Fenêtres n'a pas affez de Relief dont il faut s'en prendre à l'Exécution; mais tous s'accordent que les Proportions sont justes & le Dessein excellent. J'ai negligé le Plan, étant de très peu d'Usage dans cette Occasion. Elle sut batie l'An 1662.

La Maison De Gunnersbury près de Brentford, p. 17, 18.

ETTE Maison fut executée par Mr. Webb, Disciple de Jones, d'un Dessein de ce grand Maitre. J'en ai sait deux Planches: La premiere est le plan du premier & second Appartement: Les Appartements sont nobles, regulièrs & commodes; les Chambres bien proportionnées: Le second est le Front, qui contient une grande Base unië, supportant un beau Loggio Corinthien. Quelques-uns trouvent l'Intercolomnation dans cet Hexastyle trop ouvert, & que de laisser la Frise & l'Architrave de châque Côté du Fronton, est une Licence qu'on ne doit pas introduire sans une grande Necessité. Elle sutbâtië l'An 1663.

Nouveau Dessein pour le Duc d'Argyle, p. 19, 20.

J'AI inscrit ce Dessein à cet illustre Nom, dont les grandes Actions ont rempli le Monde de Surprise & d'Admiration; celles de Ramellies & Tannieres sont immortelles. Et comme mon plus grand Honneur consiste à descendre de son Auguste Maison, j'ai cru ne pouvoir consacrer si proprement à nul autre le premier Essay de mon Invention comme un Monument eternel de profond Respect & Reconnoissance. J'en ai donné deux Planches: Il y a deux plans dans la premiere dans un Carré de 112 Piés; les Appartements d'Etat sont en bas, elevez de la Cour de six Degrés, qui conduit dans la grande Salle, faisant un Cube de 50 Piés, & a un Loggio au dedans, qui separe les deux Etages. De la Salle vous entrez dans le Sallon, accompagné de deux nobles Appartements d'Etat, qui sont face aux Jaidins. Toutes

Square, the Diagonal, or other Proportions univerfally received. In the fecond Story is a large Library, an Antichamber of each Side, with double Apartments; over which are Mezonins for accommodating the Family, illuminated by low Lanterns from the Leads, whereby the Majetty of the Front is preserved from the ill Effect of crowded Appertures. The second is the Front, raised from the Plinth, which supports the Rusticks, adorned with a composite Order of 1 Columns, with a regular Entablature and Ballustrade; the Windows are dreffed in the Palladian Manner; and I have endeavoured to reconcile the Beauty of an Arcade in the ancient Buildings with the Conveniency of the Moderns, but must leave it others to judge of the Success. Anno 1714-

The First Design for the Right Honourable the Lord Viscount Castlemain, p. 21, 22.

THIS was intended for Wanftead, the Seat of his Lordship, in a most charming Situation, where are the noblest Gardens now in the Kingdom. In this I was a little confined as to the Dress of the Windows, which are without Pediments; and feveral other Conveniencies being wanting, the following Defign was

The Second Design for Wanstead, p. 23, to p. 27, in- Le Second Dessein pour Wanstead, p. 23, jujqu'a p. 27

THE first Plate contains the Plan of the principal Story, extended 260 Foot, raifed from the Court by a large Rustick Basement, 15 Foot in Height; the Situation requiring this Height to afford the State-Apartments a Prospect to these excellent Gardens. You ascend from the Court by double Stairs of each Side, which land in the Portico; and from thence into the Great Hall, 51 Foot long, and 36 wide, and in Height the same. This leads into the Salon, being an exact Cube of 30 Foot, attended with two noble Apartments of State, all fronting the Gardens. To the Great Court are excellent Apartments for my Lord and my Lady, with great Conveniencies; and the whole Plan is closed with a decent Chapel in one End, and a handsome Library in the other. The Offices are below, equal to the Court, and Mezonins above. The fecond is the Front, adorned with a just Hexastyle, the first yet practised in this Manner in the Kingdom. The Order is Corinthian, and the Diameter three Foot, with its proper Entablature and Ballustrade, adorned with Figures, and a Cupola. The third is the Section; and the fourth a Green-House, but design'd by another Hand.

A New Design inscrib'd to the Earl of Hallifan, p, 28, 29, 30.

S this Noble Lord is the diftinguished Patron of A the Muses, the great Mecanas of our Age, I have prefumed to honour this Defign with the Patronage of so great a Name, as a small Evidence of my Gratiwho have been honoured very early with his Lordship's Countenance, by encouraging my Labours. Of this I have made two Plates; the first is the Plan of the principal Story, extending 300 Foot, and 150 deep, raifed from the Court by fix Steps, which leads into a noble Hall, Tribune and Salon, with double Apartments of State to the Gardens: The same Apartments are repeated to the Great Court, and the whole Plan is closed with a large Gallery in one End, and a Chapel, Library, and great Stair-Case in the other. What is of Distinction in this Disposition, is, that the Bed-Chambers are removed from interrupting the grand Visto, and still the State is preserved by the Magnificence of the Entries; which I have not yet observed in any for-men Design. The second is the Front, where a large Rustico supports a Loggio, with 1 Columns of the Corinthian Order. Here the Windows are placed at due Distance, and free from that bad Effect we so frequently and Appearance of Strength, so necessary in Architecture. Done Anno 1715.

les Chambres sont ou en Forme de Quarré, le Diagonal ou autres Proportions universellement receuës. a une grande Bibliotheque au second Etage, une Antichambre de châque côté, avec de doubles Appartements; au dessus desquels il y a des Logements pour la commodifé de la Famille, illuminez par de basses Lanternes depuis les Plombs, par lesquelles la Majesté du Front est preservée du mauvais Effet de Ouvertures les unes sur les autres. Le second est le Front, elevé du Plinthe, qui supporte les Rustiques, ornez d'un Ordre composé de 1 Colomnes, avec un Entablement & Balustrade regulière; les Fenêtres sont ! de Colomnes à la Manier : Palladienne ; & j'ai tâché de reconcilier la Beauté d'une Arcade dans les anciens Bâtiments, avec la Commodité des Modernes, mais il faut que je laisse aux autres à juger du Succès. L'An 1714.

Le Premier DESSEIN pour Mylord Vicomte Castlemain, p. 21, 22.

Elui-ci étoit destiné pour Wanstead, Maison de Campagne de sa Grandeur, dans une très charmante Situation, où il y a les plus nobles Jardins qui soient à present dans le Royaume. En ceci je sus un peu borné par rapport à l'Arrangement des Fenêtres, qui sont sans Frontons; & y manquint plusieurs autres Commodités, le Dessein suivant fut preseré.

A premiere Planche contient le Plan du principal Ltage, de 260 Piés d'etendue, elevé de la Cour par une grande Base Rustique de 15 Piés de hauteur, la Situation la requerrant pour donner à ces superbes Appartements la Veue des excellents Jardins. Vous montez de la Cour par un double Degré de châque côté qui conduit dans le Portique; & de là dans la grande Salle, qui a 51 Piés de longeur, 36 de largeur, & autant de hau-Celle ci conduit au Salon, qui est un Cube exact de 30 Piés, suivi de deux nobles Appartements d'Etats, qui font tous face aux Jardins. A la Grande Cour il y a d'excellents Appartements pour Mylord & Madame, avec de grandes Commodités; & tout le Plan est fini par une belle Chapelle à un Bout, & une bonne Bibliotheque à l'autre. Les Offices sont en bas, au niveau de la Cour, & il y a des Logements au dessus. Le second est le Front, orné d'un juste Hexastyle, le premier qui ait été pratiqué de cette Maniere dans le Royaume: L'Ordre est Corinthien, & le Diametre de trois Piés, avec son propre Entablement & Balustrade, ornées de Figures, & d'un Dome. Le troisième est la Section, & le quatriême une Orangerie, mais désignée par une autre Main.

Nouveau Dessein dedié du Comte de Hallifax, p. 28; 29, 30.

OMME cet Illustre Seigneur est le Patron distingué des Muses, le grand Mecanas de notre Siecle, j'ai presumé d'honorer ce Dessein du Patronage d'un si grand Nom, comme une petite Marque de ma Reconnoissance, moi qui ai été honoré dès ma jeunesse de la Protection de sa Grandeur, qui favorisoit mes Ouvrages. J'ai fait deux Planches de celui-ci; le premier est le Plan du premier Etage, de 300 Piés d'etendue, & de 150 de profondeur, elevé de la Cour par six Degrés, qui conduisent dans une noble Salle, Tribune & Sallon, avec de doubles Appartements d'Etat vers les Jardins : Il y a aussi les mêmes Appartements vers la grand Cour; & tout le Plan finit par une grande Galerie à un Bout, & une Chapelle, Bibliotheque, & un grand Escalier à l'autre. La Distinction qu'il y a dans cette Disposition, est, que les Chambres où l'on couche sont éloignées pour ne pas interrompre la grande Veuë, & néanmoins la Grandeur est conservée par la Magnificence des Entrées; ce que n'ai pas encore observé dans uneun Dessein avant celui-ci. Le second est le Front, où un grand Rustique supporte un Loggio avec 1 de Colomnes de l' Ordre Corinthien. Ici les Fenêtres sont placées a une nous voyons frequemment quand elles sont trop serrée, qui détruit ce Repos & Apparence de Force, si necessaires dans l'Architecture. Fait l'An 1715.

Pavillion, p. 31, 32, 33.

THE first Plate contains the two Plans of the following Fronts. The second is the Front of Burlington-House. The third is the said Pavillion in the Duke of Kent's Gardens in Bedfordsbire. Defign'd by Mr. Archer, Anno 1709.

Montague-House, London, p. 34, 35, 36.

THIS great House was built by the late Earl of Montague, in the French Manner; the Apartments are very noble, and richly adorned. Here Monsieur la Fausse, Mr. Rousseau, and Mr. Baptist, have expressed the Excellence of their Art. The Architecture was conducted by Monsieur Pouget, 1678.

DRUMLANRIG-CASTLE in Scotland, p. 37, 38.

IS the ancient Seat of his Grace the Duke of Queenfbury, in the Shire of Dumfries. It was greatly adorned by the two preceding Dukes, with noble Gardens, and many other expensive Decorations.

MARLBOROUGH-House, St. James's, p. 39, 40.

S the Residence of his Grace in London; where are fine Gardens, and Prospect over St. James's The Defign was given by Mr. Wren, Anno Park. 1709.

Powis-House, London, p. 41, 42.

THIS House is built with the best Portland Stone, well executed; enrich'd with a Corinthian Pilastrade, besides a considerable Attick and Ballustrade, supported with a Rustick Basement; and was finished Anno 1714-

Buckingham-House, p. 43, 44.

THIS is the Seat of his Grace the Duke of Buckinghamshire, in a most admirable Situation, having
the noblest Avenue in Europe, the Mall, and commands
an entire Prospect over St. James's Park. I have made
two Plates. The first is the general Plan, where the
Apartments are extremely noble, richly furnished; here
is a great Stair-Case, august and lofty; here is a curious Collection of the best Painting, an admirable Statuary of Cain and Abel, by the famous Tean de Boulogn. tuary of Cain and Abel, by the famous Jean de Boulogn, with many other Rarities of great Value. In the fecond is the Front, adorned with a Pilastrade of a Co-rinthian Tetrastyle. The Whole was conducted by the learned and ingenious Captain Wynne, Anno 1705.

STOKE, in the County of Hereford, p, 45, 46.

Is the Seat of Mr. Auditor Foley, defigned and built by himself, attended with fine Gardens. Here Mr. Thornbill has expressed his excellent Genius in painting the Cieling of the Great Hall, and many other noble Decorations. Anno 1710.

KINGS-WESTON, in Gleucestersbire, p. 47, 48.

I S the Seat of the Right Honourable Edward Southwhom my Obligations are so deep, that to repeat the least Part of them, would offend the Modelty of my Benefactor. I have made two Plates. The first contains the Plans of the first and second Floor. The Apartments of State are raifed from the great Court by twelve Steps, which lead into a very lofty and spacious Hall, that rifeth the full Heighth of both Stories. From this you enter into the Apartments of State, very handfome and commodious; above is the Lodging Story, with an Attick for the rest of the Family. The second Plate is the Front, adorn'd with an Hexastyle of a Coin Pilastrade; the Architecture is great and masculine; the Windows at a proper Distance; and the whole Design sufficiently demonstrates the great Genius of the Architect, which was Sir John Vanbrugh, and finished Anno 1718.

BURLINGTON-House in Piccadilly, with the Duke of Kent's La Maison De Buelington en Piccadilly avec le Pavillon du Duc de Kent, p. 31, 32, 33.

> A premiere Planche contient les deux Plans des Fronts suivants. La seconde est le Front de la Maison de Burlington. La troissème est le dit Pavillon dans les Jardins du Duc de Kent dans la Comté de Bedford. Designez par Mr. Archer, l'An 1709.

La Maison de Montague à Londres, p. 34, 35, 36.

ETTE grande Maison fut bâtie par le feu Comte de Montague, à la Maniere Françoise; les Appartements sont très nobles, & richement ornez. Messieurs la Fausse, Rousseau, & Baptiste, y ont exprimé l'Excelle de leur Art. L'Architecture sut conduite par Mr. Ponget, 1678.

Le CHATEAU DE DRUMLANRIG en Ecoffe, p. 37, 38.

E ST l'ancienne Maison de Plaisance du Duc de Queensbury, dans la Comté de Dumfries. Elle a été beaucoup ornée, & de nobles Jardins, & de plusieurs autre Décorations d'une grande dépense par les deux precedens Ducs.

La Maison de Marlborough, St. James, p. 39, 40.

St. James. Le Dessein sur donné par Mr. Wren, l'An 1709.

La Maison de Powis à Londres, p. 41, 42.

ETTE Maison est bâtie de la meilleure Pierre de Portland, bien exécutée; enrichie d'une Pilaftrade Corinthienne, outre un considerable Attique & Ballustrade, supporté d'une Base Rustique, & sut finie

La Maison de Buckingham, p. 43, 44.

"Est la Residence de sa Grandeur le Duc de Buckd ingbamsbire, dans une très agreable Situation, ayant la plus noble Avenuë de l'Europe, le Mail, & a une entiere Vuë du Parc de St. James. J'en ai fait deux Planches. La premiere est le Plan general, où les Ap-partements sont extremement nobles, richement meublez. On y voit un grand Escalier, noble & très elevé; il y a un curieux Recueil des meilleurs Tableaux, une Statuë admirable de Cain & d'Abel, par le fameux Jean de Boulogne, avec plusieurs autres Raretez de grand Prix. Dans le second est le Front orné d'un Pilastrade d'un Tetrastyle Corinthien. Le tout sut conduit par le savant & ingenieux Capitaine Wynne, l'An 1705.

STOKE, dans le Comté de Hereford, p. 45, 46.

EST la Maison de Plaisance de Mr. l'Auditeur Foley, designée & bâtie par lui même, où il y a de beaux Jardins. Ici Mr. Thornbill a fait voir son excellent Genie en peignant le Lambris de la grand Salle, & plusieurs autres nobles Décorations. L'An 1710.

KINGS-WESTON, dans la Comté de Gloucester, p. 47, 48.

E ST la Maison de Campagne de Messire Edouard Soutbouell, qui est l'Ornement de notre Siecle, à qui mes Obligations font si grandes que je n'oserois en faire mention, de peur de blesser la Modestie de mon Bien-faiteur. J'en ai fait deux Planches. Le premier contient les Plans du premier & second Etage. Les Appartements d'Etat sont elevez de la grande Cour par douze Degrés, qui conduisent dans une superbe & spacieuse Salle, qui s'eleve de tout la Hauteur des deux Etages. De celle-ci, vous entrez dans les Appartements d'Erat, fort beaux & commodes; au dessus est l'Etage ou l'on Loge, avec un Attique pour le reste de la Famille. La seconde Planche est le Front orné d'un Hexastyle d'une Pilastrade Corinthienne, l'Architecture est grande & mâle; les Fenêtres à une juste Distance; & tout le Dessein montre suffisement le grand Genie de l'Architecte, qui fut Mr. le Chevalier Vanbrugh, & fini l'An 1713.

LINDSEY-HOUSE, in Lincoln's-Inn-Fields, London, p. 49, 50.

La MAISON DE LINDSEY, dans Lincoln's-Inn Fields, 2 Londres, p. 49, 50.

Belongs to his Grace the Duke of Ancaster, Lord Great Chamberlain of England, and is another Piece of Inigo Jones. I have made two Plates. In the first are the Plans of the first and second Stories, which contain as much State and Conveniency as can be expected in a Line of 62 Feet: The second is the Front, which has a good rustick Basement; from which riseth a regular Ionick Pilastrade, including the Principal, and an Attick Story: The Windows are well proportion'd, gracefully dreffed, without Affectation. The Fabrick is cover'd with a handsome Balustrade; and, in a Word, the Whole is conducted with that Harmony that shines in all the Productions of this great Master, who delign'd it Anno 1640.

WILLBER w in Wilesbire, p. 51, 52.

Is the Seat of William Benson Esq, invented and built by himself, in the Stile of Inigo Jones, who, by this excellent Choice, discovers the Politeness of his Tafte: And as he is Master of the most refin'd Parts of Literature, has here expressed a particular Regard to the noblest Manner of Architecture in this beautiful and regular Design, which was executed Anno 1710.

A New Design for the Earl of Islay, p. 53, 54.

S this Noble Lord is Brother to his Grace the Duke of Argyle, who possesses all the great dowments of Nature and Acquisition, I have presum'd to skreen this Design with his Lordship's Name. Here are two Plates: The first contains the two Plans, in a Square of 76 Foot; the principal Story is raifed from the Court by fix Steps, which lead unto the great Hall, 30 in Front, 40 deep, and 30 Foot high; behind this Hall is the Salon, 30 by 24 Foot, attended with double Apartments of State; the Salon is 20 Foot high, and the rest 18: Here are no Bed-Chambers, this entire Floor being devoted to State. In the next Floor are two double Apartments, viz. Anti-Chamber, Bed-Chamber, &c. with a large Library over the Salon; above the other Apartments are Mezonins, for accommodating the Family, illuminated from the Leads. The fecond Plate contains the Front, which has a large Ruftico that supports a regular Ionick Colonade of 1 Columns, though express'd in the Plan as Pilasters: Here I have omitted to continue the Rufticks, to entertain the Eye with some Repose: The Windows are proportion'd and dress'd in the Palladian Style. Anno 1715.

BLENHEIM, from p. 55, to p. 62. inclusive

HIS Noble Fabrick is the Seat of his Grace the Duke of Marlborough in Oxfordsbire. In this Collection I present the Curious with all the Plans and Elevations, by the particular Direction of Sir John Vanbrugh, who gave the Designs of this magnificent Palace. Here I am at a Lois, how to express my Obligations to this worthy Gentleman for promoting my Labours, in most generously affisting me with his Original Drawings, and most earefully correcting all the Plates as they advanced. All I can say falls infinitely short of what I owe; and yet am afraid what is already faid is much more than he will approve. The manner is grand, the Parts noble, and the Air of this majeftick Palace adapted to the martial Genius of its Patron. The first Plate contains the Ground-Story, or Vaults: The second the Principal, or Floor of State; where the Reader may, with great Ease, enter into a full Detail of the Whole by the Scale: The third is the geheral Front as you enter, making a Line of 490 Foot: The fourth is the Garden-Front: The fifth is the Elevation of one End; the other being answerable to it; The last is the general Plan. Here are noble Gardens; a stately Bridge, with an Arch 100 Foot in Diameter; excellent Embellilhments: But above rity the Glory of the British Arms. It was built Anno la Gloire des Armes Britanniques. Il fut bâti l'An 1715.

william.

PPARTIENT à sa Grandeur le Duc d'Ancaster, A Seigneur Grand Chambellan d' Angleterre, & est une autre Piece d'Inigo Jones. J'en ai fait deux Planches: Dans la premiere sont les Plans des premiers & seconds Etages, qui contiennent autant de Grandeur & Commodité qu'on puisse attendre dans une Ligne de 62 Pies: Le second est le Front, qui a une bonne Base rustique, d'où s'eleve une pilastrade lonique reguliere, inclus le Principal Etage, & l'Attique: Les Fenetres sont bien proportionnées, d'une parure agreable, sans affecta-La Fabrique est couverte d'une belle Balustrade; en un Mot, le tout est conduit avec l'Harmonie qui reluit dans toutes les Productions de ce grand Maitre, qui en fit le Dessein l'An 1640.

WILLBERY, dans la Comte de Wilts, p. 51, 52.

E ST la Maison de Guillaume Benson Ecuyer, destignée & bâtie par lui même à la maniere d'Inigo Jones, qui, par cet excellent Choix, découvre l'Excellence de son Goût: Et comme il entend parfaitement les Belles Lettres, il a fait voir ici un Egard particulier à la Maniere la plus noble de l'Architecture dans ce beau & regulier Dessein, qui fut executé l'An 1710.

Nouveau Dessein pour Monseigneur le Comte d'Islay, p 53,54.

OMME cet Illustre Seigneur est Frere de sa Grandeur le Duc d'Argyle, qui possede toutes les grandes Qualitez de la Famille, orné des plus brillantes Acqui-fitions de la Nature & de l'Art, J'ai presumé de mettre ce Dessein à l'Abri sous le Nom de sa Grandeur. En voici deux Planches: la premiere contient les deux Plans dans un Quarré de 76 Piés; le principal Etage est elevé de ·la Cour par six Degrès, qui conduisent dans la grande Salle, 30 Piés de Front, 40 de profondeur, & 30 de hau-teur, derrière cette Salle, est le Salon, 30 par 40 Piés, suivi de doubles Appartements d'Etat; le Salon est de 20 Piés de hauteur, & le reste de 18; Il n'y a point de Chambres à coucher, cet Etage étant tout entier dévoué à la Grandeur: Dans l'Etage suivant, il y a deux doubles Appartements, favoir, Antichambre, Chambre à coucher, &c. avec une grande Bibliotheque au deffus du Salon; il y a de petits Logements au dessus des autres Appartements pour la Commodité de la Famille, illuminez par le Toit. La seconde Planche contient le Front, qui a un grand Rustique qui supporte une Colonade Ionique reguliere de Colomnes, quoique marquées dans le Plan comme Pi-lastres: J'ai ici obmis de continuer les Rustiques, pour donner quelque Repos à l'Oeil : Les Fenetres sont proportionnées & ornées suivant le Stile Palladien l'An 1715.

Blenheim, depuis p. 55, jusqu' à p. 62 inclusive.

TETTE noble Fabrique est le Palais de sa Grandeur le Duc de Marlborough dans la Comté d'Oxford. Je fais present aux Curieux dans ce Recueil de tous les Plans & Elevations, par la Direction particuliere de Mr. le Chevalier Vanbrugh, qui à donné le Dessein de ce magnifique Palais. Il me manque ici des Paroles pour exprimer mes Obligations à ce digne Gentilhomme qui a encouragé mon Travail, en me donnant genereusement ses Desseins Originaux, & en corrigeant exactement toutes les Planches à mesure qu'elles se faisoient. Tout ce que je puis dire, est au dessous des Obligations que je lui ai; & cependant je crains que ce que j'ai déja dit ne soit beaucoup plus qu'il n'approuvera. La Maniere de ce Palais est grande, les Parties nobles, & l'Air majesteux adapté au Genie « martial du Patron. La premiere planche contient le Bas-Etage d'Etat; où le Lecteur peut avec grande Facilité, entrer dans un plein Détail du tout par l'Echelle. La troisième est le Front general en entrant, faisant une Ligne de 490 Piés: La quatrième est le Jardin qui fait Front: La cinquiême, est l'Elevation d'un Bout; l'autre y repondant : La derniere est le Plan general. Ici on voit de nobles Jardins; un Pont superbe, avec une Arche de 100 Piés de Diametre; & plusieurs autres excellents Embellissements: Mais sur tout, les Tableaux peints par Mr. all, the Paintings by Mr. Thornbill, the modern Apelles, Thornbill, l'Appelles moderne, dont il n'y a que le delicat whose bright Pencil is only capable to transmit to PosteCASTLE-HOWARD, fram p. 63, to p. 71, inclusive.

Is the Noble Seat of the Right Honourable the Earl of Carhife, in Torkshire: The Plans, Elevations, and Sections, are all drawn from the Originals of the Architect, Sir John Vanbrugh, and by him most carefully revised. The first Plate is the general Plan, making a Line of 660 Foot, wherein all the Offices are expressed. The second is the Plan of the principal Floor; the Portico, Great Hall, and Salon, are extremely magnificent, richly adorned with Sculpture; the Painting by Signor Pilligrini; in the Dome is expressed the Fall of Phaeton. The Apartments of State are very noble, fronting the Gardens, with a Line of 300 Foot; the riest is suited to Conveniency. The third Plate is the general Front. The fourth is the Front to the great Court. The fifth is the Garden Front; and the last is the Section. Here are excellent Gardens, Parks of great Extent, losty Obelisks. And in fine, this Seat is truly worthy of so great and so liberal a Patron, which was built Anno 1714.

CHATSWORTH, from p. 72, to p. 76, inclusive.

Is the magnificent Palace of his Grace the Duke of Devonsbire, in Derbysbire; which, for the Quality of Materials, Neatness of Execution, rich Furniture, and all proper Decorations, yields to none in the Kingdon, and perhaps in Europe. I have given three Plans, and two Elevations: The first is the Plan of the Offices, with a spacious Court, adorned with two noble Arcades: Here is a Chapel, great Hall, and Stair-Case, extremely magnificent. The second is the Plan of his Grace's own Apartment, where State is joined with great Here is a noble Gallery, a Library, with Conveniency: a Collection of the most valuable Authors, and many excellent Original Paintings of the most celebrated Masters. The third is the Plan of the principal Floor; containing the Apartments of State, which, indeed, are extreme noble. The fourth is the West Front, a very rich Piece of Architecture, the Terrals is dreffed with Frost-Work; from which is railed a large Rustick Basement, that supports an Ionick Order; and in the Middle, a a beautiful Tetrastyle, covered with an enriched Pediment: The whole Front is dreffed with excellent Sculpture, and finished with a regular Balustrade, adorned with Vases of an exquisite Choice. The last Plate is the South Front, which is very fine, but not so rich as the former. The Whole is performed in the best Stone, deserving of the best of Patrons; and is the Invention of Mr. Talman. Anno 1681.

Mr. Johnston's House at Twickenbam, p. 77.

THIS is the Seat of the Right Honourable James Johnston, Esq. It is regular and commodious. The principal Floor is raised by eight Steps from the Court, where you find a very handsome Hall that leads into the great Apartments. Here is an admirable Prospect of the most charming Part of the Thames, where the Eye is entertained with a thousand Beauties, not to be conceived but from this Situation. The Gardens are extreme curious, the Plantations most artfully disposed; and every Thing contributes to express the refined Taste and great Pohteness of the Master. Design'd by Mr. James, 1710.

Sir WILLIAM YONGE'S House, p. 78, 79.

THIS is the Seat of Sir William Yonge, Bart. in Devonshire. I have made two Plates: The first contains the two Plans of the first and second Story. In the first is the Floor of State, raised from the Court by 12 Steps, where you find very handsome Apartments well furnished. In the second Story is the Chamber Floor, with proper Conveniencies. The second Plate is the Front, which was executed Anno 1690.

Mr. CARY's House at Rowbampton, p. 80, 81.

THIS is the Seat of Thomas Cary, Efq; in Surry, in a most agreeable Situation: The Apartments are well disposed for State and Conveniency. The Salon is very noble, and has an excellent Ceiling, by Mr. Thorn-

Le CHATEAU-HOWARD, depuis p. 63, jusqu' a p. 71, inclusive.

ST la Noble Maison du Comte de Carlisse, dans E la Comté d'York: Les Plans, les Elevations, & Sections, sont tous tirez des Originaux de l'Architecte Mr. le Chevalier Vanbrugh, & très soigneusement reveus par lui-même. La premier Planche est le Plan general faisant une Ligne de 660 Piés où toutes les Offices sont marquées. La seconde est le Plan du principal Etage; le Portique, la grande Salle & Salon sont extremement magnifiques, richement ornez de Sculpture; la Peinture par Signor Piligrini, dans le Dome, on voit la Chute de Phaeton. Les Appartements d'Etat sont fort nobles faisants fronts aux Jardins sur une Ligne de 300 Piés; le reste est fait pour la Commodité. La troisième Planche est le Front general. La quatriême est le Front vers la grande Cour. La cinquieme est le Jardin de Front; & la derniere est la Section. Il y a ici d'excellents Jardins, des Parcs d'une grande Etendue, de superbes Obelisques. enfin, ce lieu est véritablement digne d'un si grand & sl genereux Seigneur, il fut bâti l'An 1714.

CHATSWORTH, de la p. 72, à p. 76, inclusive.

E ST le magnifique Palais de sa Grandeur le Duc de Devonsbire dans la Comté de Derby, qui, pour la Qualité des Materiaux, la propreté de l'Execution, la Richesse des Meubles, & toutes les Décorations convenables, n'en doit rien à aucun du Royaume, ni peut-être de l'Est rope. J'en ai donné trois Plans, & deux Elevations : Le premier est le Plan des Offices avec une Cour spacieuse ornée de deux nobles Arcades: On y voit une Chapelle, une grande Salle, & un Escalier tout a fait magnifique. Le second est le Plan de l'Appartement de sa Grandeur, fort riche, ou la Grandeur est jointe a de grandes Commodi-tez; on y voit une noble Gallerie, une Bibliotheque avec un Recueil des Auteurs les plus estimez, & piusieurs excellents Originaux de Peintures des plus fameux Maitres. Le troisième est le Plan du principal Ftage, contenant de superbes Appartements, qui, verritablement, sont très nobles. Le quatrième est le Front au Ouest, très riche morceau d'Architecture; la Terrasse est parce d'Ouvrage en Bosse; d'où s'eleve une grande Base Rustique, qui sup-porte une Ordre Ionique; & au milieu, un beau Tetrastyle, couvert d'un riche Fronton : Tout le Front est paré d'excellente Sculpture, & fini par une Balustrade reguliere, or-née de Vases d'un Choix exquis. Le dernier Plan est le Front au Sud, qui est très beau, mais pais si riche que le premier. Le tout est fait de la meilleure Pierre, digne du meilleur des Patrons , & est de l'Invention de Mr. Talman. L'An 1681.

La Maison de Mr. Johnston, à Twickenbam, p. 77.

L'EST la Residence de Messire Jacques Jobnston, Ecuier. Elle est reguliere & commode. Le principal Etage est elevé de huit Degrès au dessus de la Cour, ou vous trouvez une très belle Salle qui conduit dans les grandes Appartements. On y a une admirable Veuë de la plus charmante Partie de la Thamise, ou l'Oeil est rejout de mille Beautes qu'on ne sçauroit concevoir que de cette Situation. Les Jardins sont très curieux, les Arbres disposés avec un Art admirable; & tout contribué à exprimer le Goût rasiné, & la grande Politesse du Maitre. Designé par Mr. James. L'An 1710.

La Maison de Mr. Chevalier Guillaume Yonge, p. 78,79.

'EST la Residence de Mr. le Chevalier Baronet Guillaume Yonge dans la Comté de Devon. J'en ay fait deux Planches: La premiere contient les deux Plans de premier & second Etages. Dans le premier est l'Etage d'Etat, elevé de la Cour par 12 Degrès, où vous trouvez du beaux Appartements bien meublés. Au second Etage sont les Chambres à loger, avec des Commodités qui y repondent. La second Planche est le Front, qui su executé l'An 1690.

La Maison de Mr. CARY à Rowbampton, p. 80, 81.

C'EST la Residence de Mr. Thomas Cary dans la Comté de Surrey, très agreablement située, les Appartements sont bien disposez pour la Grandeur & Commodité. Le Salon est très noble, & a un Lambris excel-

bill. But above all, the humanity and Liberality of lent, par Mr. Thornbill. Mais fur tout, l'Humanité & Lithe Master deserves to be transmitted to Posterity. The Besign was given by Mr. Archer, Anno 1710.

GREENWICH-HOSPITAL, from p. 82, to p. 89. inclusive.

THIS Royal Hospital was at first intended by King Charles II. for a Royal Palace; but was given by King William and Queen Mary for the Relief of decay'd and disabled Seamen, who had spent their Blood and Strength in the Naval Service. It is situaated on the Bank of the Thames, four Miles below the Bridge of London, and is for Magnificence, Extent, and Conveniency, the first Hospital in the World. I have given four large Plates: The first is the general Plan of this stupendous Structure, which contains the State-Apartments, with great Variety of Accommodation: The second is the general Front, that commands a charming Prospect of the River and adjacent Country: The third is a double Pavillion at large, which makes a Part of the preceding Front: And the last is the Return of the same Pavillion, flank-The Stile of Architecture is great and noble, executed by Mr. Webb, from a Design of his great Master Inigo Jones. Some are of Opinion, that the Attick over the great Corinthian Order is too high by the great Plinth, being just so much more than one Third of the Column which probable was changed from the Opinion. lumn, which, probably, was changed from the Original Drawing. In the best Remains of Antiquity, we find great Variety in their Proportions: In the Triumphal Arch of Titus, the Attick has a full Third of the entire Ordonnance; in that at Benevento, near the same; at Ancona a fourth; in that of Constantine the Attick has four 9th Parts of the Column; that of Severus is precisely one Third: I shall leave it to better Judges to determine the Preference. But to return to the prefent subject: Here the Rusticks are introduced with fo much Art, the Ornaments with fo much grace, the whole Disposition is so noble and lofty, that, in the Opinion of many it's one of the best Lines of Building in the World. There is so much to be said on this copious subject, that indeed it requires an entire Volume; and possibly I may one Day entertain the Publick with it. But here I can't neglect mentioning that excellent Ceiling in the great Hall, by Mr. Thornbill, to his eternal Honour, and that of his Country: Here Foreigners may view with Amazement our Countrymen with Pleasure, and all with Admiration the Beauty, the Force, the Majesty of a British Pencil! rich in Invention, correct in Design, noble in Disposition, in Execution admirable. 1715.

THORSBY-House, p. 90, 91.

Is the Seat of the Duke of Kingston in Nottingbam-bire. I have made two Plates: The first is a Plan, which entertains you with a noble Hall, a fine Chapel, a large Court, Apartments of State, and all other Conveniencies: The second is the Front, extream rich; perform'd by the same Hand that afterwards built Chatsworth. Here are beautiful Gardens; and all is worthy of so noble and great a Patron. It was built Anno 1671.

STAINBOROUGH, p. 92, 93, 94.

THIS is the magnificent Seat of the Right Honourable the Earl of Strafford, &c. in Yorkshire. which I have made two Plates: In the first are the Plans of the first and second Stories; the first is raised above the great Court by 12 Steps, which leads into a spacious Hall, and very large Apartments of State and Conveniency: The second Plan presents you with a noble Gallery, that takes up the entire Front in a Line of 180 Feet, and has the Height of the Principal and Attick Story: Here the noble Patron is preparing a curious Collection of Painting, Sculpture, and other excellent Decorations. The second Plate is the Front of this fumptuous Fabrick, railed with a large Basement, where the Coins are bound with Rusticks, which support a rich Corinthian Pilastrade, that carries the Principal and Attick Story; the Order has a regular Entablature, a handsome Balustrade, adorn'd with

beralité du Maitre meritent d'être-transmises à la Posterité. Le Dessein en fut donné par Mr. Archer, l'An 1710.

L'Hopital de Greenwich, depuis la p. 82, jufqu'à p. 89, inclusive.

ET Hopital Royal fut d'abord destiné par le Roi Charles II. pour un Palais Royal; mais il fut donné par le Roi Guillaume & la Reine Marie pour le Soulagement des Mattelots vieillis & estropiez, qui ont repandu leur Sang & épuité leurs Forces dans le Service de la marine. Il est situé sur le Bord de la Thamise, quatre Milles au dessous du Pont de Londre, & pour la Magnificence, l'Etendue & la Commodité, est le plus bel Hopital du Monde. J'en ai donné quatre grandes Planches: La premiere est le Plan general de cette etonnante Structure, qui contient les Appartements d'Etat, avec une grande Varieté de Commodités : La seconde est le Front general, d'où l'on découvre un charmant coup d'Oeil de la Riviere & Campagne des environs: La troisième est un double Pavillon en grand, qui fait Partie du Front precedent; & la dernière est le Retour du même Pavillon qui fait Flanc à la première grande Cour du côté de la Riviere. Le Stile de l'Architecture est grand & noble, executé par Mr. Webb, d'un Dessein de fon grand Maitre Inigo Jones. Quelques-uns sont d'opinion; que l'Attique au dessus du grand Ordre Corinthien est trop haut de tout le grand Plinthe, ayant justement cela de plus que le tiers de la Colomne, ce qui, probablement à été changé du Plan Original. Dans les Ruïnes de l'Antiquité, il y a de grands Changemens dans leur Proportions. Dans l'Arc de Triomphe de Titus, l'Attique a un plein troisième de l'entiere Ordonnance; dans celui de Benevent, presque autant ; à Anconne, un quatrieme ; dans celui de Constantin l'Attique a quatre neuviemes parties de la Colomne; celui de Severe est precisement un troisieme : Je laisserai à de plus habiles Connoisseurs à determiner la Preference. Mais pour revenir au present Sujet: Les Rustiques y sont introduits avec tant d'Art, les Ornements avec tant de Grace, toute la Disposition est si noble & superbe, que, suivant l'Opinion de pluseurs, c'est une des meilleures Lignes de Bâtiment du Monde. Ce copieux Sujet demanderoit un Volume entier; & peut-être qu'un Jour j'en ferai part au Public. Mais je ne faurois ici m'empecher de faire mention de cet excellent Lambris de la grande Salle, peint par Mr. Thornbill, à son Honneur éternel, & celui de son Païs. Les Etrangers peuvent remarquer dans ce Lambris avec Etonnement, nos Compatriotes avec Plaisir, & tous avec Admiration, la Beauté, la Force, la Majesté du Pinceau Britannique! riche en Invention, correct dans le Dessein, noble dans la Disposition, & admirable dans l'Execution. 1715.

La Maison de Thorsby, p. 90, 91.

E ST la Maison du Duc de Kingston dans la Comté de Nottingham. J'en ai fait deux Planches: La premiere est un plan qui vous presente une noble Salle, belle Chapelle, une Cour spacieuse, des Appartements su-perbes, & toutes autres Commodités: La seconde est le Front, extremement riche, fait par la même Main qui a bâti ensuite Chatsworth. On y voit de beaux Jardins; & le Tout est digne d'un si noble & grand Patron. Elle sut bâtie l'An 1671.

STAINBOROUGH, p. 92, 93, 94.

E ST la Maison magnisique de Monseigneur le Comte de Strafford, dans la Comté d'York. Dont j'ai fait deux Planches: Dans la premiere sont les Plans du premier & second Etage; le premier est elevé au dessus de la grande Cour par 12 Degrés, qui conduisent dans la grande Salle, & de très spacieux Appartements d'Etat & de Commodité: Le second Plan vous offre une noble Gallerie, qui comprend tout le Front dans une Ligne de 180 Pies, & est de la Hauteur du principal Etage & de l'Attique: Le noble Patron y prepare un Recueil curieux de Tableaux de Sculpture, & d'autres excellentes Decorations. La seconde Planche est le Front de cette somptüeuse Fabrique, elevée par une grande Bâse, où les Coins sont limitez par des Rustiques, qui supportent une riche Pilastrade Corinthienne, qui soutient le principal Etage & l'Attique; l'Ordre a un Entablement regulier, une belle Balustrade, ornée de Figures & de Vases; les FeFigures and Vases; the Windows are richly dress'd: The whole Architecture is after the Venetian Manner, perform'd in Stone; and all is agreeable to the Politeness, Quality, and Distinction of the Patron. Anno 1715.

A New Design for the Lord Percival, p. 95, 96, 97.

I Have inscribed this Design of my Invention to this noble Lord, who has universally encouraged all Arts and Sciences, and that of Architecture in a most particular Manner. Here are two Plates: The first is the general Plan; the two covered Arches, that join the Offices to the House, are disposed to receive Coaches, for Conveniency in wet Weather; the chief shoor is above, having a noble Salon in Front, and two sine Apartments behind. The second is the general Front, making a Line of 245 Foot; the Body of the House contains 120, which I have dressed with the two most ancient Orders, the Dorick and Ionick, in a double Hexastyle; the first has 2; in Diameter; the second has two Foot; the first advanceth ½ from the Wall, and has but eight Diameters in Height, which I thought the best Proportion to support the superior Order, to which I give nine. The Arcade is equal to one Half of the Hexastyle; the Pavillion extends 36, and has 30 in Height, including the Balustrade. I have left out all Manner of Rusticks, and other Ornaments generally practifed, purely to shew the Harmony of Proportion in the greatest Simplicity. Anno 1715.

The Lord LEIMPSTER's House, p. 98, 99, 100.

THIS is the Seat of the Lord Leimpster in Northamptonshire. Of which I have made two Places: The first is the general Plan, including all the Offices, great Court, and Plan of the principal Floor; where are very noble Apartments, with great Conveniency. The second is the general Front, with a rustick Basement, which supports a Corinthian Pilastrade that carries two Stories: The Fabrick is sinished with an Attick, and all is performed in very good Stone; and is the ingenuous Invention of Mr. Hawksmore, to whom I am indebted for the Original Drawings of this House, and many other valuable Pieces, for enriching this Work, which I could not in Gratitude conceal from the Publick. The Building was sinished Anno 1713, with which I conclude this stirst Volume.

nêtres sont richement parées: Toute l'Architecture est à la Maniere Venitienne, faite en Pierre; & le tout repond à la Politesse, Qualité, & Distinction du Patron. L'An 1745.

Nouveau Dessein pour le Lord Percival, P 95, 96, 97.

J'Ai dódié ce Deffein de mon Invention à ce noble Seigneur, qui a universellement encouragé tous les Arts & Sciences, & celui de l'Architecture d'une Maniere toute particuliere. Voici deux Planches: La premiere est le Plan general; les deux Arches, qui joignent les Offices à la Maison, sont disposées pour recevoir des Carrosses, à l'Abri en Tems de Pluie; le principal Etage est en haut, ayant un noble Salon en Front, & deux beaux Appartements derriere. La seconde est le Front general, faisant une Ligne de 245 Piés; le Corps de la Maison en contient 120, que j'ai parez des deuz plus anciens Ordres, le Dorique & l'Ionique, dans un double Hexastyle; le premier a 2½ de Diametre, le second en a 2; le premier avance de ½ de la Muraille, & n'a que huit Diametres de Hauteur, que j'ai cru la meilleure Proportion pour supporter l'Ordre superieur, auquel j'en donne neuf; l'Arcade est egale à une Moisié de l'Hexastyle; le Pavillon s'etend de 36, & en a 30 de Hauteur, y compris la Balustrade. J'ai omis toute Sorte de Rustiques, & autres Ornements generallement pratiqués purement pour montrer l'Harmonie de la Proportion dans la plus grande Simplicité. 1715.

La Maifon du Lord LEIMPSTER, p. 98, 99, 100.

C'EST la Residence du Lord Leimpster dans la Comté de Northampton. Dont j'ai fait deux Planches: La premiere est le Plan general, comprenant tous les Offices, la grande Cour, & le Plan du principal Etage; ou il y a de nobles Appartements fort commodes. La seconde est le Front general, avec une Bâse rustique, qui supporte une Pilastrade Corinthienne, qui soutient deux Etages: La Fabrique est finie par une Attique, & le tour est fait en bonnes Pierres de taillea; & est de l'ingenieuse Invention de Mr. Hawksmore, à qui je suis redevable des Desseins Originaux de cette Maison, & de plusieurs autres Pieces estimables pour enrichir cet Ouvrage, que je n'ai pu sans être coupable d'Ingratitude cacher au Public. Le Bâtiment sut sini l'An 1713; avec lequel je conclus ce premier Volume.
